For employers or persons conducting a business or undertaking (PCBUs), it’s your duty to use a risk management approach to manage fatigue, as outlined in the Work Health and Safety Act 2011. Following a four-step risk management process will help your business meet its responsibilities under work health and safety (WHS) laws.

29/01/2019 · Such indicators of “doing” say little about psychosocial drivers of participation such as motivation, social connection, preferences, choice and meaningfulness [19, 22, 23]. This paucity of theory leads to a situation whereby enhancement of participation outcomes is often an aspiration, but reliable, environmental or psychosocial interventions are not available.

At Community NeuroRehab, we understand that needs change over time, and we do our best to diminish the cognitive, physical, behavioral, and psychosocial complications of brain injury. Our unique, community-based program is designed specifically for individuals experiencing a variety of difficulties as a result of a brain injury. We take a person-centered approach to rehabilitation ...

Residential rehabilitation programs (sometimes called therapeutic communities) are usually long-term programs where people live and work in a community of other substance users, ex-users and professional staff. Programs can last anywhere between 1 and 24 months (or more). The aim of residential rehabilitation programs is to help people develop the skills and attitudes to …

NC-SARA is a voluntary, regional approach to state oversight of post-secondary distance education and pertains to approval of distance education courses that are offered across state lines by institutions that already have degree authorization in at least one state. As a participant in NC-SARA, Thomas University can offer distance education to any other SARA state member.

Clare et al. (2006) define rehabilitation as “an individualized approach to helping people with cognitive impairments in which those affected, and their families work together with health care professionals to identify personal-relevant goals and strategies for addressing these”. This definition clearly shows a connection between rehabilitation and the concept of person …

(i) The State vocational rehabilitation bureau, division, or other organizational unit that is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of individuals with disabilities and that is responsible for the administration of the vocational rehabilitation program of the State agency, as required under § 361.13(b); or

Erikson's theory was the first to propose a lifespan approach to development, and it has encouraged the belief that older adults still have developmental needs. Prior to Erikson’s theory, older adulthood was seen as a time of social and leisure restrictions and a focus primarily on physical needs (Barker, 2016). The current focus on aging well by keeping healthy and active …
